

BUDGET APP DESIGN FILE

USER BREIF DESCRIPTION

- Awonke is finding it hard to budget his money.
- As soon as his salary enters his bank account, it leaves.
- He cannot keep track of his spending.
- Every month he, is frustrated on how he can solve the problem that he is facing.

THE SOLUTION

The solution is to design a user interface where the user will be able to:

- Track their spendings by providing them with motivation and advice on their spendings.
- Add expenses (which must be less than the budget) and income.
- Add a budget (which will be less than the income)

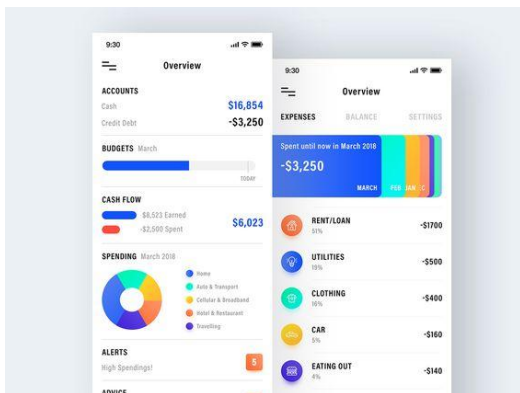

The user interface must be adaptable to all users.

THE RESEARCH

CUSTOMER RESEARCH

Target	Youth 18 – 28 years
Demographics	Student or employed
Colour interests	Colourful and Bright
Problem facing	Spending money

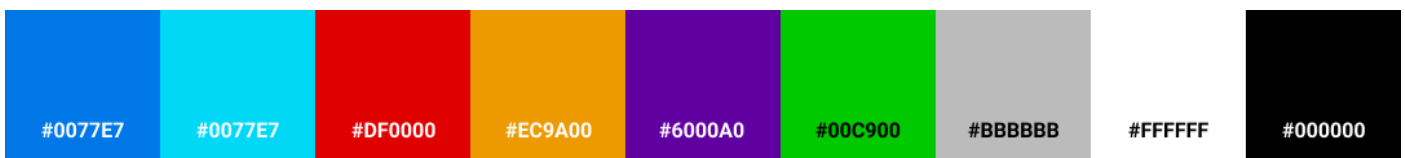

DESIGN RESEACH

I found a design from Pinterest that suits the target market and started working with it.

THE DESIGN

COLOUR PALLET

FONT USED

Roboto, sans-serif
